

Solar Opportunities for Owners Through Illinois Solar for All

Last Updated: September 8, 2023

Are you a homeowner or the owner of a single-family building or a two-to-four-unit building? You may be eligible to save money on your electricity costs.

Illinois Solar for All (ILSFA), an income-qualified state program, allows you to install a solar system on your roof or in your yard with no upfront costs and low or no monthly fees. Single-family homeowners who participated in Illinois Solar for All have saved an average of more than \$1,000 annually on electric bills. Individual savings will vary. Each home and offer is different, and you can learn your expected savings by requesting a “standard disclosure.”

Consider this offer, and call the approved solar company, known as Approved Vendors, for a specific quote for your home. Be sure to request the company’s ILSFA offer. Participants must be income-eligible and receive an electricity bill. Visit the ILSFA website to [determine your income eligibility](#).

Other Solar Opportunities:

Renters and owners of multi-family buildings can also participate in ILSFA. Learn more at:

IllinoisSFA.com/for-il-residents.

ILSFA focuses on income-eligible households with enhanced benefits and consumer protections. Households that do not qualify for ILSFA can subscribe to community solar projects or receive incentives for a residential solar system through another solar incentive program, Illinois Shines. For more information, visit **IllinoisShines.com**.

Questions? Call the ILSFA Program Administrator at 1-888-970-ISFA (4732).

“Being a senior, I was interested in the savings, and there was a big savings component [from the program]. That’s what motivated me”

Lytese Dubois, Illinois Solar for All participant

Illinois Solar for All

Solar Company’s Residential Solar (Small) Offers

A solar company in the Illinois Solar for All (ILSFA) program has made the following residential solar standardized offer available for eligible Residential Solar (Small) program participants. This offer is available to standard systems of up to 10 kW in size. Individual offers may vary based on site considerations.

Name of Approved Vendor	GRNE Solar
Region(s) ¹	Cook County North East North West East Central West Central
Building Type(s)	Single-family, 2-4 units
Roof Type(s)/Ground Mount?	Flat roofs, pitched roofs, and ground-mounted
Offer Type²	Power Purchase Agreement (PPA)/Lease
Date Offer Expires	12/31/2023
Contract Length	15 years
Base Offer Rate³	\$0 (single family, 2-4 units)

¹ Regions are based off of those listed in the Approved Vendor Directory, available here: www.IllinoisSFA.com/vendor-directory/

² A Power Purchase Agreement charges fees based on the production of the solar project, a lease charges set monthly fees, while a purchase charges a flat amount. For more information on these offer types see the Residential Solar Brochure, available here: <https://www.illinoisfa.com/app/uploads/2019/05/0419-ILSFA-infosheet-distributed-generation-v10.pdf>. Regardless of the offer type, the solar company may not include charges that exceed 50% of the value of the energy savings from the solar project.

³ Note, offer rates may not be representative of the offer’s total cost, as additional fees could apply. More detailed information about an offer will be provided on the Standard Disclosure form that the solar company is required to provide to you as part of an offer. Solar companies may present participants with the Standard Disclosure Form and installation contract in the same interaction and both documents can be executed contemporaneously. The participant has the right to cancel within fourteen calendar days of executing the contract at no cost. If a solar company does not provide you with a Standard Disclosure Form as part of an offer, contact info@IllinoisSFA.com or call 1-888-970-ISFA (4732).
