

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:0:0.0 --> 0:0:0.490

Alexandria Cedergren  
It's.

0:0:2.960 --> 0:0:23.400

Alexandria Cedergren

OK. Good afternoon, everyone. Thank you for joining this second Advisory committee meeting. For those of you who are unable to attend the last meeting, my name is Alexandria Cedergren. You can call me Alexandria or Ali. I'm a senior associate for community engagement at Elevate, which is the program administrator for Elsa.

0:0:26.90 --> 0:0:44.60

Alexandria Cedergren

So this is our agenda for today. We'll go through introductions of the group again a little more quickly as time probably we'll talk through our meeting goals and guidelines and then jump into some consumer protection topics and finally into go into some of an update on the residential solar pilot.

0:0:46.540 --> 0:1:13.910

Alexandria Cedergren

So I think most of this group was in attendance at the last meeting, but we do have some new faces that were unable to or new people that were unable to attend the first meeting. So I'll go first and then I'll kind of go through our participant list just so that it's a little bit organized. So again, my name is Alexandria Cedergren. You can call me Alexandria or Allie. My pronouns are she, her, hers. I live in Chicago, and I represent elevate.

0:1:14.590 --> 0:1:17.290

Alexandria Cedergren

And the committee, and I'm sure you've all seen my emails.

0:1:19.230 --> 0:1:20.20

Alexandria Cedergren

OK.

0:1:21.620 --> 0:1:29.170

Alexandria Cedergren

Quickly we can go through. We have a handful of Members from Elevate on the call today as well. So I'll start with Amy.

0:1:31.500 --> 0:1:44.180

Amy Jewel

Hi, good afternoon everyone. My name is Amy Jewel, I'm the vice president of programs at Elevate and excited to be here in and hear from you all today. I will pass it over to Elizabeth from elevate.

0:1:46.0 --> 0:2:0.340

Elizabeth Hittman

Uh, hey everyone, I'm Elizabeth. I'm also like you said, from elevate. I work with mostly with the vendor managers and we matched the project pipeline, but I'm happy to be here and I will pass it to Jan.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:2:5.500 --> 0:2:6.360

Elizabeth Hittman  
Oh yeah, you're muted.

0:2:8.180 --> 0:2:20.610

Jan Gudell  
Thank you. Sorry about that, Jan Gudell here. I'm a senior strategist with the Illinois Solar for all program and I will pass it to Antonia.

0:2:22.420 --> 0:2:29.820

Antonia Ornelas  
Thanks. Hi, Antonia ornelas. I'm chief program officer at Elevate. Excited to be here today. Thank you.

0:2:31.860 --> 0:2:33.440

Alexandria Cedergren  
Thank you. And finally, Laura.

0:2:34.910 --> 0:3:4.300

Laura Oakleaf  
Everyone. Laura oakleaf. I am the director of ILSFA at Elevate. She. Her, hers. I'm on the north side of the city in Edgewater and really excited to have you all here. And, you know, have a meeting where we're gonna dig in some more meaty topics to hear from all of you on, which is why we have a little bit bigger team from elevate because these are some discussions we've been having and wanna make sure they all hear what you have to say.

0:3:4.840 --> 0:3:5.630

Laura Oakleaf  
So thanks.

0:3:6.880 --> 0:3:11.280

Alexandria Cedergren  
Thank you, Laura. And then I'll pass it over to Jen Schmidt from the IPA for her team.

0:3:12.500 --> 0:3:28.690

Schmidt, Jennifer M.  
Hi, my name is Jennifer Schmidt. My pronouns are she and her. I'm the Illinois solar parole program manager for the Illinois Power Agency. I live in West Ridge, which is a little bit West of Rogers Park in Chicago and.

0:3:29.550 --> 0:3:39.400

Schmidt, Jennifer M.  
I, like I said, I represent the Illinois Power Agency, and I'm the liaison between the IPA and elevate. And I will pass it to Rachel.

0:3:41.10 --> 0:3:51.970

Granneman, Rachel  
Everyone. My name is Rachel Granneman. I am Consumer Protection Council with the Illinois Power

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

Agency. So that's who I'm here on behalf of my pronouncer. She and her. And I'm looking forward to listening in on the discussion today.

0:3:55.480 --> 0:3:57.390

Alexandria Cedergren

Thank you, Rachel. Karen, you wanna go ahead?

0:3:59.920 --> 0:4:12.610

Craig, Karen

Hi everyone. My name is Karen Craig. I go by she and her. I live on the West side of Chicago in E Garfield Park. I am the consumer protection specialist with the IPA.

0:4:14.480 --> 0:4:16.620

Alexandria Cedergren

Thank you, Karen and Abby.

0:4:20.750 --> 0:4:40.360

Ramirez, Abigail

Hi everyone. I'm Abby Ramirez. I work at the IPA. My pronouns are she her a a I live here in the city of Chicago on the West side and then I am a program associate for the Illinois Solar for all programs. So I work under Jen and interact with Elevate and the GPS and different areas. And I'll pass back to Allie.

0:4:41.750 --> 0:4:47.170

Alexandria Cedergren

Thank you, everyone. Now we'll go through our committee members. So Amit, do you want to introduce yourself?

0:4:49.560 --> 0:5:6.670

amit shukla

Yeah. My name is Amit Shukla and I'm with renewable energy starting solutions. We do a lot of workforce development in under ILSFA actually FEJA and CEJA now. And then also we're gonna approved vendor for the ILSFA program.

0:5:9.440 --> 0:5:10.700

Alexandria Cedergren

Yell Elise.

0:5:14.0 --> 0:5:27.630

Christianson, Elise

Hi my name is Elise Christensen. She her pronouns I work out of the northern suburbs and I am the program manager for GRNE solar and we are an approved vendor in Illinois solar phone.

0:5:29.570 --> 0:5:30.670

Alexandria Cedergren

Thank you, Ariel.

0:5:32.470 --> 0:5:48.200

Drehobl, Ariel

Everybody. My name is Ariel drew hobol. Pronounce R she her and I work for the national community

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

Solar partnership in the solar office of the Department of Energy. And I live in Washington, DC, but I have lived in Illinois in the past.

0:5:49.910 --> 0:5:51.110

Alexandria Cedergren

Thank you, Megan.

0:5:53.680 --> 0:5:57.350

Early, Megan (MidAmerican)

Hey, I am Megan early. I am.

0:5:58.10 --> 0:6:4.90

Early, Megan (MidAmerican)

Representing mid American energy, we have territory in.

0:6:4.840 --> 0:6:14.550

Early, Megan (MidAmerican)

Iowa, Illinois, South Dakota and Nebraska. I live in Bettendorf, IA. My pronouns are she and her.

0:6:16.780 --> 0:6:19.750

Early, Megan (MidAmerican)

And I am all ears at this point.

0:6:21.30 --> 0:6:29.420

Early, Megan (MidAmerican)

I I just want to learn. I I don't unfortunately have much to add, so I just wanna be a bunch of years.

0:6:30.500 --> 0:6:32.790

Alexandria Cedergren

Happy to have you here. Thank you. Megan. Carol.

0:6:35.770 --> 0:6:41.820

Garth, Carol L

Hi, I'm Carol. Garth. My pronouns are she and her. I live in St. Louis, MO, and I represent Ameren Illinois.

0:6:43.140 --> 0:6:44.980

Alexandria Cedergren

Thank you, Jay.

0:6:47.210 --> 0:6:57.140

Jay Corgiat

Jay corgiat. I am he him? His central Rd. energy or aggregators and the Illinois Solar for all program. And I live in Florida.

0:6:58.540 --> 0:6:59.670

Alexandria Cedergren

Thanks John.

0:7:4.200 --> 0:7:34.220

John Delurey

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

Yeah. John. Larry. He him pronouns. I live in the Bridgeport neighborhood of Chicago, and I represent vote Soldier, which is the national solar and climate and energy justice organization. And so I run the Midwest for them. Also, as I mentioned last time I wear the hat is Co facilitator of the Illinois Solar for All Working Group, which is a collection of companies and grassroots educators and advocacy organizations. That all works. Try to make this program.

0:7:34.320 --> 0:7:34.890

John Delurey  
Even better.

0:7:36.380 --> 0:7:37.200

Alexandria Cedergren  
Thank you, John.

0:7:38.420 --> 0:7:38.920

Alexandria Cedergren  
Lori.

0:7:52.410 --> 0:7:56.180

Alexandria Cedergren  
Lori, I thought I saw you unmute, but now you're muted again. Are you there?

0:8:3.650 --> 0:8:7.820

Alexandria Cedergren  
Doesn't seem like we can hear you, so might be a an audio issue on your end.

0:8:11.240 --> 0:8:14.970

Alexandria Cedergren  
I think, well, we'll move on to the next person and see if Lori maybe you can.

0:8:16.340 --> 0:8:18.660

Alexandria Cedergren  
Fix your audio. Umm. Justin.

0:8:21.580 --> 0:8:29.930

Range, Justin J  
Hello, Justin range. He him his. I live in Edwardsville, IL and IMD, director of Power Supply for Ameren Illinois.

0:8:31.500 --> 0:8:33.40

Alexandria Cedergren  
Thank you, Mike.

0:8:36.720 --> 0:8:58.580

Stieren, Michael  
Hi everyone. My name is Mike Stieren and I'm a policy and listen to the ICC based at a Springfield, my main responsibilities ICC mainly involved reviewing and analyzing policies related to the IPA's. Two large procurement plans, the long term renewal plan, which includes the Just block program and it's various sub programs as well as the electricity procurement plan. Thank you.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:8:59.730 --> 0:9:1.340

Alexandria Cedergren  
Thank you, van.

0:9:7.120 --> 0:9:11.390

Van Vincent  
Hi, my name is Van Vincent and I'm where the CEO VLV development.

0:9:12.240 --> 0:9:19.940

Van Vincent  
And I am here to contribute in making Illinois one of the best places to create renewable energy.

0:9:22.500 --> 0:9:24.110

Alexandria Cedergren  
Thank you, B.

0:9:31.250 --> 0:9:48.870

Vee Likes  
Hi everybody. I'm Vee likes and I am the developer director. Who are Kenwood, Oakland Community organization, well known as Coco although I live downtown. Our community supports environmental justice communities, black and environmental justice communities on Chicago's South side.

0:9:49.540 --> 0:9:55.930

Vee Likes  
My role here is to ensure the that doing this just transition that we are.

0:9:57.600 --> 0:10:15.90

Vee Likes  
Properly, additively promoting awareness of the clean energy, individual and clean and community benefits of clean energy and ensuring that our folk are properly connected and fully participating in these benefits.

0:10:17.170 --> 0:10:19.550

Alexandria Cedergren  
Thank you, B and Yvonne.

0:10:22.860 --> 0:10:36.850

Yvonne  
Hello, my name is Yvonne Long. I work with Capitolo and the Greater Peoria area. We primarily work in the marketplace serving nonprofit, tax-exempt organizations and.

0:10:39.20 --> 0:10:46.950

Yvonne  
And do projects behind the meter. But we're we're we are are dabbling in community solar a little bit as well but very happy to.

0:10:48.390 --> 0:10:58.650

Yvonne

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

To support the program and to add whatever benefit we might be able to. Similarly, to make the program even more effective. So thank you.

0:10:59.910 --> 0:11:7.150

Alexandria Cedergren

Thank you. And we have somewhat looks like on a cell phone. I'm I'm not sure who that is, but if you would like to unmute and introduce yourself.

0:11:9.210 --> 0:11:11.80

293121678485

OK. Can everyone hear me?

0:11:11.520 --> 0:11:11.800

Alexandria Cedergren

Yes.

0:11:12.490 --> 0:11:29.690

293121678485

OK, hung up the cell phone. I'm. I'm on. I'm on this one now. OK, I'm good. Afternoon, everyone. My name is Senora Colbert, and I did. My pronouns. Are she her? I live in Dalton, Illinois, which is the South suburbs of Chicago, and I represent.

0:11:30.70 --> 0:11:46.60

293121678485

Ohh myself as being a residential solar customer and I also volunteer with people for community recovery, which is a grass root organization nonprofit organization located out in Argyle Gardens where I grew up at.

0:11:47.790 --> 0:11:49.80

Alexandria Cedergren

Alright. Thank you, senora.

0:11:51.20 --> 0:11:56.990

Alexandria Cedergren

And Lori, if you could introduce yourself again, see if your audio works.

0:12:7.650 --> 0:12:8.380

Alexandria Cedergren

OK.

0:12:10.150 --> 0:12:14.770

Alexandria Cedergren

I'm still not hearing anything. Laurie. Yeah, it's OK. Thank you for sending that in the chat.

0:12:15.440 --> 0:12:16.970

Alexandria Cedergren

Perfect. OK.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:12:17.550 --> 0:12:22.260

Alexandria Cedergren

Well, it's great to have you all here. And I think with that we can move on into.

0:12:23.400 --> 0:12:53.390

Alexandria Cedergren

A little bit more of the discussion. So just again to remind everyone that the main goal of this committee is to increase program participation by using your expertise to inform the ongoing development and improvements of the program, including meaningful and informed conversations between all of our stakeholders and agencies here, providing education and information about participation in the program, encouraging more stakeholder and public feedback and developing and proposing improvements to the ILSFA program. And although the ultimate decisions by.

0:12:53.470 --> 0:13:7.470

Alexandria Cedergren

Come on. Changes to the ILSFA program will be made by the Illinois Power Agency. This group is key to informing those decisions because it is made-up of a variety of ILSFA stakeholders that have valuable and unique voice experiences and expertise.

0:13:9.470 --> 0:13:29.60

Alexandria Cedergren

So just to review the meeting guidelines that we have, if you could please when you would like to speak, raise your hand and we will call on you to unmute. And if you were not speaking then please remain muted so that we can minimize the background noise and we will keep track of any additional topics that are brought up during the discussions.

0:13:29.900 --> 0:13:34.980

Alexandria Cedergren

And we also please ask that you respect your fellow committee members and their feedback.

0:13:37.340 --> 0:13:42.310

Alexandria Cedergren

So our first topic is related to Community solar subscription management.

0:13:44.730 --> 0:13:48.830

Alexandria Cedergren

And so there currently are no specific requirements for how approved vendor.

0:13:49.780 --> 0:13:54.850

Alexandria Cedergren

Lists and communications to participants after signing up, but before energy.

0:13:55.680 --> 0:14:26.950

Alexandria Cedergren

Community solar project and so the program administrator has heard concerns that there should be consumer protection requirements particular to participation in ILSFA around how wait lists are managed and how customers are informed about project updates. And so particularly for ILSFA participants, there is a desire they're able to realize these savings as quickly as possible and have

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

reasonable expectations and when they will see and what they will see on both utility and community solar bills.

0:14:27.170 --> 0:14:35.290

Alexandria Cedergren

So based on this kind of brief background, we are considering the following proposal stood on the slide here.

0:14:36.720 --> 0:14:45.640

Alexandria Cedergren

You know, those are very quick background. So there are, are there any questions on this before we kind of touch on a a secondary topic on the next slide.

0:14:55.940 --> 0:14:57.150

Alexandria Cedergren

See you have a question?

0:14:59.500 --> 0:15:3.260

Vee Likes

Why do we all already have folk waving on the giveaway?

0:15:4.360 --> 0:15:15.810

Vee Likes

We signed up almost all nearly 300 from the community, but another 100 plus are on the wait list. Forgive array, they're not really receiving updates.

0:15:16.720 --> 0:15:21.700

Vee Likes

So I'm just saying, is that really active or is it getting ready to be implemented at active?

0:15:28.810 --> 0:15:29.210

Vee Likes

That's.

0:15:24.310 --> 0:15:55.460

Laura Oakleaf

Have you? That's actually really helpful to know. Sorry. This is Laura again. And yeah, I think that's actually one of the concerns that we wanna make sure we are addressing that people have a better understanding of what is going on with the program. So with those particular projects, they're currently full, but they're, you know, with all community solar projects, there is a decent amount of churn of subscribers. You know, people who move out of the area or.

0:15:56.660 --> 0:15:58.370

Laura Oakleaf

You know, for whatever reason.

0:15:58.450 --> 0:16:4.20

Laura Oakleaf

That pull out of the program. And so that's what they are using for that.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:16:5.310 --> 0:16:7.490

Laura Oakleaf

That's what they're using the wait list for, but.

0:16:8.910 --> 0:16:35.750

Laura Oakleaf

Yeah, that's sort of the the root of this. You know, conversation is, how do we make sure that people know what the status of the project is and, you know, sort of what the extent of that waitlist looks like. So, yeah, that's that's exactly on point. And it's kind of helpful to have that as context for current on the ground. What we're starting to see because those are some of the first projects that we've seen.

0:16:37.230 --> 0:16:41.400

Laura Oakleaf

Go through, energize. Have people signed up and now have a wait list.

0:16:45.10 --> 0:16:49.310

Alexandria Cedergren

Yes, thank you. And I think that's useful information to kind of.

0:16:50.310 --> 0:16:50.750

Alexandria Cedergren

Get.

0:16:49.70 --> 0:16:59.700

Vee Likes

OK, sorry. I just had one follow up. Since I have Laura on for looking at also the upcoming one for the due bill, two bills strategy is employed.

0:17:0.560 --> 0:17:5.50

Vee Likes

I'm trying to understand but these vendors are asking our customers are.

0:17:5.880 --> 0:17:9.310

Vee Likes

Keep 30 resident to sign up directly with them.

0:17:9.580 --> 0:17:9.910

Laura Oakleaf

Umm.

0:17:10.510 --> 0:17:17.860

Vee Likes

I'm trying to get that the number one approve emitters are not allowed to collect information that commits a household to a project.

0:17:20.20 --> 0:17:20.390

Vee Likes

We.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:17:19.630 --> 0:17:39.10

Laura Oakleaf

Yeah. So the idea with this is sort of making a distinction between someone who is signing up for a project that has space available and doing that sign up versus a project like the ones you were just talking about and give array where they're fully subscribed. And so there's a wait list.

0:17:40.160 --> 0:18:8.840

Laura Oakleaf

So what's on the screen here is about, you know, we don't want people sitting on our original thought on this was that we thought that we wouldn't want people sitting on a waitlist who feel they are fully committed to that project because they've shared, you know, billing information or things like that. They should have the opportunity to be looking for other projects that might be accepting subscribers more quickly so that they can.

0:18:9.100 --> 0:18:26.760

Laura Oakleaf

We're kind of go to that and then when they their name came up on the way list, they'd be able to, you know, decline that and say, hey, I'm already signed up with this other one. So they're not, you know, waiting unnecessarily because they were on a wait list for one project when now there's actually something available more immediately.

0:18:31.420 --> 0:18:32.50

Vee Likes

Thank you.

0:18:32.450 --> 0:18:32.730

Laura Oakleaf

Umm.

0:18:35.70 --> 0:18:37.20

Alexandria Cedergren

Thank you V Yvonne, go ahead.

0:18:39.620 --> 0:18:46.770

Yvonne

I think that's a a really valid concern for for potential residents too.

0:18:48.270 --> 0:19:4.900

Yvonne

Tap that information and that ability, and to know that that they're not committed on the developer side. It's really great to have at least basic information to be able to go through the waitlist effectively and to to know that you have the potential for.

0:19:6.60 --> 0:19:26.590

Yvonne

Backfilling any position you know positions as they people choose to drop off, so I like the thoughtfulness behind ensuring that people who are on the wait list don't lose the opportunity to do another project while they're waiting for the for the that current project to be done.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:19:29.720 --> 0:19:35.150

Laura Oakleaf

Yeah, I think that's a good point that we talked about a little, but I'd be curious to hear from any of the approved vendors.

0:19:35.230 --> 0:19:41.530

Laura Oakleaf

Umm, in terms of oh, you know, management of the waitlist process, you know?

0:19:42.500 --> 0:19:54.710

Laura Oakleaf

How, if there be a possibility for you know, someone who's subscribed elsewhere to kind of uncheck their box and get off the list easily, you know, without putting too much burden on individual.

0:19:55.950 --> 0:20:4.420

Laura Oakleaf

Customers, you know, but also wanting to keep in mind, if there's, you know, things to help manage that list from your point of view too.

0:20:5.880 --> 0:20:27.30

Yvonne

Sure. I mean I you know on our side we're we're pretty flexible. So if a customer says that they're not interested, then we're we just are moving to the next person on the list and letting them know to contact us in the event that they might change their mind. And we're really comfortable with that. It's helpful. Like I said, to have to have a list so that.

0:20:27.90 --> 0:20:39.900

Yvonne

You know that you have some, you know, confidence that you can quickly get that out to other people and be able to move through so that people have that benefit available to them as quickly as we can get it out to them.

0:20:41.60 --> 0:20:48.470

Yvonne

So we don't, we don't collect just you know, to be clear, we don't collect information about payments, there's not a.

0:20:49.670 --> 0:20:56.680

Yvonne

There's no obligation and we're not. We're not even, you know, we aren't even doing disclosure forms until.

0:21:4.880 --> 0:21:5.200

Laura Oakleaf

OK.

0:20:58.560 --> 0:21:5.340

Yvonne

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

Until they would be ready to get the information, but we're still have their information in a an A wait list format.

0:21:5.880 --> 0:21:21.530

Laura Oakleaf

Yeah, that's helpful. I think that's what we wanna make sure is happening and it seems like that's pretty common practice, but you know, is that a program requirement that also needs to be in places new people come into the program and new projects are developed?

0:21:27.290 --> 0:21:36.620

Alexandria Cedergren

Great. Any other comments on this slide? We do have some questions for discussion on a separate slide related to this topic.

0:21:41.290 --> 0:21:42.620

Alexandria Cedergren

OK, great.

0:21:48.680 --> 0:22:20.810

Alexandria Cedergren

I'm so another topic around community. Solar waitlists is the use of TBD for project assignments on disclosure forms. And so within Illinois shines, the approved vendors can optimize their customer acquisition for a portfolio of projects by listing the project on the disclosure form as TBD and an with an ILSFA, there is a concern that because participants aren't assigned to a specific project, they're essentially on a waiting list but don't get updates about a particular project's progress to know when they might start to see savings. So.

0:22:21.250 --> 0:22:23.710

Alexandria Cedergren

And that's a little bit of the background information.

0:22:24.920 --> 0:22:32.620

Alexandria Cedergren

And because of that, we're considering a proposing a deadline for or kind of a time period for project assignment.

0:22:34.350 --> 0:22:43.600

Alexandria Cedergren

Are there? I have some discussion questions in the next slide. Are there any other or questions or clarifying questions for the background of this topic before moving on?

0:22:46.840 --> 0:23:18.30

Laura Oakleaf

I can provide maybe just a little bit more background in terms of, you know from a developer's perspective if they're managing subscriptions for more than one project, it's helpful for them to at the same time it's helpful for them to sort of collect a big pool of participants and then allocate them to the projects in the way that makes most sense. And so we sort of started from the point of acknowledging

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

that that makes sense from a sort of process and operations perspective, but then want to make sure that we are.

0:23:18.350 --> 0:23:29.890

Laura Oakleaf

Acknowledging you know, again this sort of overarching concern of making sure that potential participants have enough information and aren't left waiting on.

0:23:31.150 --> 0:23:49.770

Laura Oakleaf

You know what essentially is an A wait list at that point and you know because they have a really large size subscription compared to others are really small size. They kind of keep getting pushed down to the bottom of the list and don't have any transparency into the fact that that might be happening.

0:23:50.910 --> 0:24:3.990

Laura Oakleaf

Because they're just on this bigger TBD and aren't aware of, you know, out of a pool of five projects, four of them have gone live and they didn't make it on to any of those projects, for example.

0:24:6.760 --> 0:24:10.110

Alexandria Cedergren

Great. Thank you are for a little extra background there.

0:24:11.710 --> 0:24:12.580

Alexandria Cedergren

OK.

0:24:13.740 --> 0:24:27.930

Alexandria Cedergren

I'll move on to so these are just the different discussion questions based on those last two slides. So thinking about is, should there be a maximum number of customers allowed on the wait list? How long should those customers be on the wait list?

0:24:31.430 --> 0:24:44.110

Alexandria Cedergren

How often should there be updates on the schedule for energization and then the maximum amount of time that someone should be allowed to stay as a TBD status on that disclosure form for the community solar project?

0:24:46.250 --> 0:24:47.10

Alexandria Cedergren

So I guess.

0:24:49.720 --> 0:24:50.760

Alexandria Cedergren

We can start.

0:24:51.440 --> 0:25:1.250

Alexandria Cedergren

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

And I don't know if some of the Elevate team has kind of some more background on what, how many Members we are customers we see already on a wait list and if that's?

0:25:2.830 --> 0:25:7.260

Alexandria Cedergren

Should be reduced and whatnot to help kind of discuss this first question.

0:25:25.500 --> 0:25:25.930

Alexandria Cedergren

Umm.

0:25:11.900 --> 0:25:29.60

Laura Oakleaf

I don't know that we know much about that. Actually it's, you know, we have, we have maybe a example or two. Elizabeth might know more than I do, but I think that's kind of more on the subscription manager side. We we haven't had a lot of transparency into that as of yet.

0:25:31.690 --> 0:26:1.500

Elizabeth Hittman

Yeah, we try to have regular. Uh, this is Elizabeth federally. Let me turn my camera. We tried to have regular check-ins with the approved vendors that are managing community solar projects. And like Laura said, we only have really had that give foray projects as our first one. So we meet with the give A ray folks every other week. And it does sound like they maybe have a handful of customer turnover each month. So maybe let's say like 5.

0:26:1.630 --> 0:26:23.570

Elizabeth Hittman

Customers turnover. So we have started having conversations with them about about their wait list and I know you had mentioned that. So we trying to find that balance between having a waitlist that people aren't sitting on for a really long time, but knowing that they can fill in those spots as customers turn over.

0:26:24.740 --> 0:26:26.720

Elizabeth Hittman

And I think 2 it's, you know finding.

0:26:27.40 --> 0:26:53.420

Elizabeth Hittman

Umm, you know, pairing customers up with their desired subscription sizes. So if a customer turns over or moves out of the territory and they had a three kilowatt, you know subscription size, is there somebody on the wait list? So the three kilowatt you know need and right now they're doing you know first come first serve on the wait list, but there is that little caveat of trying to pair.

0:26:54.590 --> 0:26:59.560

Elizabeth Hittman

People up who are first on the wait list, but also matching their subscription size so.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:27:0.800 --> 0:27:11.420

Elizabeth Hittman

We are in that learning process, but yeah, I think ultimately we just don't want folks waiting on a wait list for a super long time. So I think this is a good question.

0:27:18.640 --> 0:27:35.230

Laura Oakleaf

And I think maybe it's more, it might be hard to say sort of the maximum number of customers, a lot on a wait list without talking about the how long I customer can be on the wait list question. And so you know wanted to hear thoughts on that.

0:27:35.410 --> 0:28:0.820

Laura Oakleaf

Umm. And it really. These are all kind of a piece like yeah. Also wanna balance giving transparency to customers. But you know don't want to inundate their e-mail box with you know, weekly emails. They don't really care about if there's no real updates there. So thinking about that in terms of ongoing subscription and you know project updates is important too.

0:28:11.790 --> 0:28:26.200

Laura Oakleaf

Not sure if anyone on is currently managing a project with wait lists and you know outside of ILSFA is, you know helpful experience as well. It doesn't have to be specific to our projects at the moment.

0:28:33.340 --> 0:28:34.30

Alexandria Cedergren

Go ahead, Evan.

0:28:34.680 --> 0:28:35.130

Yvonne

OK.

0:28:36.310 --> 0:28:42.310

Yvonne

That's ours. Ours are not it. It's not an ILSFA project and it's our first one. So we're we're learning as we go to, but.

0:28:43.150 --> 0:28:51.160

Yvonne

Umm, in terms of, you know, like how long a customer can be on the waitlist, I'd be, you know, hesitant to to tell a Community member.

0:28:52.510 --> 0:29:0.990

Yvonne

That that they can only be on a wait list for so long if they would like to stay on it kind of leave it up to them to make that choice for how long they'll stay.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:29:1.660 --> 0:29:6.120

Yvonne

And communication, same thing we've we've been.

0:29:7.400 --> 0:29:10.700

Yvonne

Sitting out regular communication, but if we really don't have an update.

0:29:11.310 --> 0:29:29.940

Yvonne

Umm. Then then you know we're mindful of that as well and not just sending something to say we don't have an update at this time and then also be if there's certain requirements that are placed than the questions going to be to back to how that's managed and.

0:29:31.830 --> 0:29:35.110

Yvonne

And not managed. What's the right word?

0:29:38.840 --> 0:29:39.100

Laura Oakleaf

Umm.

0:29:36.930 --> 0:29:41.520

Yvonne

Ensuring compliance or conformance, I'm not sure. I'm not sure how to how to say that, but.

0:29:43.960 --> 0:29:59.820

Yvonne

And I I we don't do a TBD but but frankly we we did indicate an approximate timeline for when a project would be done and then that factors outside of our control continuously are impacting through supply chain issues so.

0:30:1.0 --> 0:30:8.840

Yvonne

As that changed, then we would communicate that out. So it it's it's tough to say that there's a date that will stay pretty solid.

0:30:9.410 --> 0:30:30.740

Laura Oakleaf

Yeah, with those updates, do you feel I get what you were saying about, you know, not wanting to provide updates if there hadn't been a change? Were you ever at a point where that sort of status quo lasted a while and, you know, it was worth just saying, hey, we didn't forget about you or was it frequent enough that that didn't become an issue?

0:30:32.100 --> 0:31:1.810

Yvonne

Yeah, I I don't think it became an issue too much from my perspective, but if somebody missed an e-mail, I guess there could be that as well where they're like. Oh well, I didn't see that last e-mail. I have

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

gotten quite a few comments related to that where they indicated they didn't receive a disclosure form or they didn't receive an e-mail. I can clearly see it was sent through the adjustable block program portal. So I I'm not really sure what's happening with that one, but we've managed it.

0:31:3.390 --> 0:31:7.800

Yvonne

On a case by case basis, but it's a small project and and so it's it's manageable.

0:31:14.520 --> 0:31:27.270

Laura Oakleaf

Sev had a question in the chat. Is there a way to say waitlist updates will be provided every 15 or 30 days? Yeah, that's what that was sort of what we were initially thinking of, you know.

0:31:28.50 --> 0:31:32.240

Laura Oakleaf

Same you will hear from us every, you know, certain amount of time.

0:31:33.640 --> 0:31:50.790

Laura Oakleaf

But that was, you know, I I think that's part of the question. What is that right interval that is actually providing updates and people aren't questioning, you know, my still on the waitlist versus spamming folks in boxes. And then the operational side of that.

0:31:51.950 --> 0:32:0.10

Laura Oakleaf

But I think you Van was just talking about, you know, a lot of our requirements are just making sure that.

0:32:0.760 --> 0:32:11.440

Laura Oakleaf

The approved vendors are are aware of them. I think with you know something along this, it would probably make sense to, you know see see the program administrator as updates go out or something like that but.

0:32:13.380 --> 0:32:15.470

Laura Oakleaf

If you have other thoughts on sort of the operas.

0:32:16.50 --> 0:32:34.150

Laura Oakleaf

Is it about? Yeah. Getting the operation. Sorry. Can't talk this afternoon. Getting the operation side of that functioning as easily as possible. Definitely open to hearing about that. But it probably depends on sort of what we end up deciding ultimately on these questions on the slide here.

0:32:39.370 --> 0:32:42.710

Laura Oakleaf

Anyone else have sort of questions either from the?

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:32:43.590 --> 0:32:48.80

Laura Oakleaf

Companies side versus in or from the resident participant side.

0:32:50.490 --> 0:32:54.0

Laura Oakleaf

And I see what Lori said it you know, maybe there can be an online update page.

0:32:55.500 --> 0:33:1.90

Laura Oakleaf

Yeah, I think that's definitely something to consider too. And I'm I think some of the.

0:33:3.910 --> 0:33:6.280

Laura Oakleaf

Projects already have some of that, but.

0:33:8.440 --> 0:33:16.10

Laura Oakleaf

Yeah. I think trying to figure out how to how individuals figure out where they are as a part of that might be a, you know.

0:33:16.950 --> 0:33:25.250

Laura Oakleaf

Like you said, it's it's maybe a combination of both a resource for people to go to and then proactively pushing out information as well.

0:33:45.410 --> 0:33:47.720

Laura Oakleaf

Any other thoughts on this from our?

0:33:48.650 --> 0:33:58.440

Laura Oakleaf

Uh utility or advocacy folks out know if you've had any exposure to other state programs elsewhere that might have helpful learnings.

0:34:7.40 --> 0:34:7.490

Laura Oakleaf

OK.

0:34:8.660 --> 0:34:24.380

Laura Oakleaf

Well, feel free to think about this and update us if anything else comes to mind. This is sort of our, you know, this was initial conversations we've had at elevate and with the IPA and we'll likely be putting together for a stakeholder.

0:34:24.460 --> 0:34:39.150

Laura Oakleaf

Your feedback comment, process either through on its own or as part of approved vendor manual

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

updates, but wanted to sort of broaden that discussion to this group and get helpful feedback. So this has been helpful. Thank you.

0:34:40.750 --> 0:34:43.760

Alexandria Cedergren

Yes, thank you everyone for the feedback so far.

0:34:44.660 --> 0:34:51.90

Alexandria Cedergren

And so we'll move on to the next topic related to single project approved vendors.

0:34:53.780 --> 0:34:55.990

Alexandria Cedergren

So there are some instances where.

0:34:56.210 --> 0:35:1.970

Alexandria Cedergren

And we have a single project approved vendor that submits a community solar.

0:35:2.450 --> 0:35:32.920

Alexandria Cedergren

Umm, projects by setting up an LLC ownership structure for the project, and so this allows them to make an assignment of the project to another company without that company needing to register with ILSFA because they technically bought the approved vendor for the project. And this has an impact on the job training requirements as well as potential implications if the parent company has contracts with customer acquisition companies or Community Action agencies.

0:35:34.10 --> 0:35:40.20

Alexandria Cedergren

And they haven't. If they haven't registered as designees because they aren't working for the approved vendor.

0:35:40.860 --> 0:35:55.180

Alexandria Cedergren

And there are rather look working for a large company and so on this slide you can see the proposed action to require these entities register as a vendor or aggregator through ILSFA.

0:35:56.450 --> 0:36:7.150

Alexandria Cedergren

That was so kind of that background brief background. Does anyone have any questions before we move on to kind of more pointed discussion questions around this topic?

0:36:15.740 --> 0:36:19.530

Alexandria Cedergren

OK, well, if anything comes up as we discussed, please let us know.

0:36:20.790 --> 0:36:33.420

Alexandria Cedergren

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

And so these were the few discussion or questions for discussion for you all. So as I mentioned last slide, if these entities should be required to register as a vendor or aggregator through ILSFA?

0:36:35.190 --> 0:36:45.420

Alexandria Cedergren

Should that requirement to be after one project or after two projects have been acquired and then finally should they register, have their?

0:36:46.580 --> 0:36:53.230

Alexandria Cedergren

If they're working with other companies or CA, should those register as designees through ILSFA as well?

0:36:59.370 --> 0:37:0.290

Alexandria Cedergren

Umm so.

0:37:1.530 --> 0:37:3.270

Alexandria Cedergren

I'll put it to you all.

0:37:7.140 --> 0:37:12.130

Laura Oakleaf

I can give maybe a little bit more context on the job training part of it. The concern there is that.

0:37:14.10 --> 0:37:42.780

Laura Oakleaf

Our job, some of the job training requirements are based on an approved vendors portfolio of work. So if they have, you know 10 projects, they don't necessarily have to meet the job training requirements for each of those projects, but rather they have to meet the same percentage across the projects. So the concern here is that if you have an entity that is buying up individual single project approved.

0:37:43.110 --> 0:37:53.390

Laura Oakleaf

Vendor projects. They are essentially acting as an approved vendor and have many projects across the portfolio.

0:37:54.750 --> 0:37:55.180

Laura Oakleaf

But.

0:37:55.840 --> 0:38:0.870

Laura Oakleaf

They could only be, you know, the job training requirements.

0:38:1.980 --> 0:38:19.30

Laura Oakleaf

May not have to roll up to that portfolio the same way they would if they were in approved vendor with their own portfolio of projects. And you know that probably comes more into account if there are waivers to the requirements that sort of let an individual project.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:38:19.190 --> 0:38:26.970

Laura Oakleaf

Umm, you know off the hook, so to speak. If there are mitigating circumstances and we review those individually, but.

0:38:28.150 --> 0:38:32.460

Laura Oakleaf

That sort of where that concern is and just wanted to give that background.

0:38:33.960 --> 0:38:37.510

Laura Oakleaf

And you know, think through there's sort of this complex.

0:38:39.50 --> 0:38:51.340

Laura Oakleaf

You know, we've set out sort of, you know your company and here are the rules. But I think what we're starting to see is there is a lot of complex business relationships that we're seeing in terms of parent companies and.

0:38:52.970 --> 0:38:58.810

Laura Oakleaf

Business relationships and how all of those should apply to the requirements that we currently have.

0:39:10.210 --> 0:39:21.530

Laura Oakleaf

And I think the other question here is too if are there other, you know customer impacts that we should be thinking about that haven't come up in, you know this set of questions so far?

0:39:22.570 --> 0:39:26.420

Laura Oakleaf

If we're maybe not quite hitting all of the issues, let us know.

0:39:53.570 --> 0:40:6.160

Laura Oakleaf

OK, well it seems like this one is maybe a little bit more straightforward as we've started to talk about it and define it more so. But again, if there are additional questions or thoughts that come up, please let us know.

0:40:10.140 --> 0:40:10.970

Alexandria Cedergren

Right.

0:40:11.960 --> 0:40:30.780

Alexandria Cedergren

So with that, we'll move on to our final topic for today, which is discussing an update on the residential solar pilot. And so this was the proposal for this pilot was released a few weeks ago and the public comment period just ended this week for that, so.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:40:31.860 --> 0:40:41.250

Alexandria Cedergren

I have just kind of the broad top questions for top bum. Sorry, uh, topic questions that were released for are requested for comment.

0:40:43.50 --> 0:40:49.820

Alexandria Cedergren

And I do have more if people have questions or want to see more specifics on what that includes, I have those slides as well.

0:40:51.880 --> 0:41:3.950

Alexandria Cedergren

But I will go through now just kind of a quick summary of some of the comments we got back during the comment period before we kind of dive into maybe some more discussion.

0:41:5.610 --> 0:41:7.840

Alexandria Cedergren

And so we had a few comments.

0:41:9.370 --> 0:41:35.650

Alexandria Cedergren

One uh specified, keeping the initial instead of within the role of program administrator and approved vendor. We have proposed to split up those roles a little bit differently for the residential solar pilot and one comment suggested keeping all of these sites assessments with the approved vendor instead of having the program administrator do kind of an initial site assessment before the vendor did the final one.

0:41:36.950 --> 0:41:50.380

Alexandria Cedergren

We also had suggestions to include some new Community criteria, some of which includes a proximity to a seizure, workforce hub and also identifying areas that are recovering coal communities.

0:41:52.780 --> 0:42:21.670

Alexandria Cedergren

In terms of defining our third geography geographic area for the pilot instead of only using one county outside of the comma territory, defining that as multiple counties and we had one comment suggest looking at the Metropolitan Micropolitan statistical areas because of more of a relationship between the different counties in central and southern Illinois. One county area doesn't necessarily represent one community.

0:42:23.80 --> 0:42:33.290

Alexandria Cedergren

And then finally, we had some comments on the RFP criteria that was outlined for the approved vendors. So one comment focuses on.

0:42:34.900 --> 0:42:50.920

Alexandria Cedergren

Allocating more points to the plan to employ job trainees and also including within the commitment to

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

the Community and participants category looking at how those vendors have demonstrated working with the trusted community messenger.

0:42:51.880 --> 0:42:53.300

Alexandria Cedergren

Umm. And so I.

0:42:54.500 --> 0:43:2.970

Alexandria Cedergren

This is a very brief kind of summary of those comments. I can go back. This is just again the broad list of topics.

0:43:5.620 --> 0:43:7.330

Alexandria Cedergren

So if anyone I know that.

0:43:8.490 --> 0:43:9.730

Alexandria Cedergren

I don't know if.

0:43:11.90 --> 0:43:16.240

Alexandria Cedergren

Some people in the call were able to look through the proposal and those questions for comment.

0:43:19.330 --> 0:43:32.980

Alexandria Cedergren

But now if anyone has can have some thoughts or if they would like to see more of the detailed question we had in the request for comments to discuss, now I can get that slide for you all.

0:43:34.980 --> 0:43:38.950

Laura Oakleaf

An Ellie, maybe it's helpful to talk through sort of next steps in the process, so that.

0:43:39.680 --> 0:43:40.120

Alexandria Cedergren

Yes.

0:43:44.940 --> 0:43:45.470

Alexandria Cedergren

Mm-hmm.

0:43:40.390 --> 0:43:47.320

Laura Oakleaf

You know comments will be posted so soon, so everyone can see all of those and maybe talk through the calendar a little bit.

0:43:47.970 --> 0:44:18.580

Alexandria Cedergren

Yeah, absolutely. So we are posting the comments today on the on the ILSFA website as an

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

announcement and then following that, we are going to be working through those comments. And our plan is to post kind of our response to comments and a final project proposal or outline for February 24th. And following that, we are planning to select the three different community areas and releasing that announcement on March 10th.

0:44:19.420 --> 0:44:32.100

Alexandria Cedergren

So we have a few weeks before that and then the next step after selecting those communities would be to release the RFP for our the approved vendors and that would be March 17th for the release of that RFP.

0:44:33.610 --> 0:44:37.900

Alexandria Cedergren

So you have a lot of things coming soon, but you know this.

0:44:38.590 --> 0:44:54.220

Alexandria Cedergren

Request for comment was really important for us to hear from you all because and and just our stakeholders in general because you have a lot of experience working in the field already and so hearing your comments and thoughts is helpful for our development of the pilot and so.

0:44:56.90 --> 0:45:2.420

Alexandria Cedergren

We wanted to kind of open the floor more to you all if you had some initial thoughts on anything that we need should consider.

0:45:3.990 --> 0:45:10.640

Alexandria Cedergren

As were, you know, going through comments and making those final edits to the the development of the pilot itself.

0:45:18.700 --> 0:45:23.560

Alexandria Cedergren

If anyone has any questions that come to mind about the pilot that I didn't mention.

0:45:32.200 --> 0:45:32.660

Alexandria Cedergren

Yes.

0:45:25.850 --> 0:45:41.970

Laura Oakleaf

Alright, maybe it's more helpful to put up the other side you had about the comments we received and now we haven't talked about those much internally yet, but interested to hear if anyone has sort of initial reactions to any of these.

0:45:43.360 --> 0:45:45.910

Laura Oakleaf

You know, from your point of view.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:45:46.720 --> 0:45:49.130

Laura Oakleaf

Any any issues with these or?

0:45:50.690 --> 0:45:54.610

Laura Oakleaf

We have kind of want to pile on and saying you think they're a good idea or not.

0:46:1.260 --> 0:46:7.560

Laura Oakleaf

And if you're one of the people that submitted them and want to give your argument for why, feel free to do that too.

0:46:8.880 --> 0:46:10.330

Laura Oakleaf

Yeah, I see it. Lori, go ahead.

0:46:11.60 --> 0:46:12.720

Laurie Fields (Guest)

OK, is my microphone working now?

0:46:13.210 --> 0:46:13.800

Alexandria Cedergren

Yes.

0:46:13.10 --> 0:46:13.850

Laura Oakleaf

It is.

0:46:14.140 --> 0:46:17.850

Laurie Fields (Guest)

Yeah, I think you're it out. OK. I was just gonna say I I wanna.

0:46:19.20 --> 0:46:42.510

Laurie Fields (Guest)

Second, the community definition as being more than a county. I don't know that I I know very few people down here in southern Illinois who are only living in one working in one county. I regularly go to three and four counties for different things. And so it is a lot bigger geographic space that I think is appropriate to consider for communities. So I just want to at the.

0:46:43.230 --> 0:46:44.600

Laurie Fields (Guest)

You say yes to that one so.

0:46:45.150 --> 0:46:46.20

Laura Oakleaf

Yeah. Thank you.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:46:46.380 --> 0:46:47.300

Alexandria Cedergren

Yeah. Thank you.

0:46:56.100 --> 0:47:11.890

Laura Oakleaf

This kind of curious on that question, maybe our Ameren folks have experience in terms of some of the energy efficiency programs. Is there any, you know, geographical areas you use for those programs that might be helpful to think about?

0:47:22.80 --> 0:47:22.510

Laura Oakleaf

Got it.

0:47:14.630 --> 0:47:22.890

Range, Justin J

This is Justin for member Illinoisfa. Unfortunately, the EE department does not fall under our our realm of responsibility, so we can't answer that.

0:47:30.260 --> 0:47:34.250

Range, Justin J

If you'd like to reach out to me on the side, I can put you in touch with who is responsible for that, but.

0:47:35.550 --> 0:47:35.960

Alexandria Cedergren

Cheap.

0:47:34.630 --> 0:47:36.100

Laura Oakleaf

OK. Yeah, we'll do that. Thank you.

0:47:42.330 --> 0:47:45.440

Alexandria Cedergren

I think one other comment that related to kind of the.

0:47:47.380 --> 0:47:49.370

Alexandria Cedergren

Central southern Illinois definition.

0:47:49.780 --> 0:48:17.840

Alexandria Cedergren

Uh, in a a comment, I was unable to put in the summary here was maybe using community selection criteria. That's a little bit different depending on the geography or that may might reflect more of kind of the priorities in different regions and splitting up kind of what our goals are depending on what has already been done historically through ILSFA. So because there has been a lot less residential solar in southern Illinois.

0:48:18.280 --> 0:48:42.980

Alexandria Cedergren

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

Umm, focusing on serving those underserved populations and in Chicago or in the northern suburbs, maybe having more of a goal to largely support the smaller and emerging AVS because there has been some more movement with residential solar up north. And so that was one comment that I also saw and I don't know if people had.

0:48:44.30 --> 0:48:46.530

Alexandria Cedergren

As people feel strongly to support that as well.

0:48:48.150 --> 0:48:52.770

Alexandria Cedergren

And maybe ways that we could differentiate between the two kind of.

0:48:53.840 --> 0:48:55.860

Alexandria Cedergren

And regions in selection.

0:49:2.370 --> 0:49:6.0

Laura Oakleaf

Sorry, I think I saw your hand go up again, but that might have been from before.

0:49:10.850 --> 0:49:12.300

Laura Oakleaf

OK, must have been from before.

0:49:13.880 --> 0:49:14.640

Alexandria Cedergren

No worries.

0:49:18.760 --> 0:49:24.560

Alexandria Cedergren

Well, if anything does come to mind with regards to the pilot program.

0:49:25.690 --> 0:49:27.60

Alexandria Cedergren

Please reach out.

0:49:28.240 --> 0:49:34.660

Alexandria Cedergren

Very interested to hear about everyone's just here, everyone's thoughts and if anything, you know is.

0:49:35.600 --> 0:49:42.650

Alexandria Cedergren

Yeah, it would be. It would be great to hear if anything does come to mind for anyone as we continue to make final edits.

0:49:46.890 --> 0:49:49.210

Alexandria Cedergren

So if there's nothing else.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:49:58.220 --> 0:50:2.410

Alexandria Cedergren

All right. I will move on then into kind of our closing.

0:50:3.400 --> 0:50:3.820

Alexandria Cedergren

Umm.

0:50:5.610 --> 0:50:6.670

Alexandria Cedergren

So.

0:50:9.540 --> 0:50:24.10

Alexandria Cedergren

As usual, each meeting recording and transcript will be posted, at least for now, and an announcement on the ILSFA website. We are working on getting the Advisory committee web page up and running on the ILSFA website.

0:50:25.270 --> 0:50:29.500

Alexandria Cedergren

And so that will be out there shortly in the near future.

0:50:30.990 --> 0:50:37.790

Alexandria Cedergren

And I will be reaching out to you all with some more updates on the next committee and subcommittee meeting times and agendas.

0:50:39.350 --> 0:50:51.330

Alexandria Cedergren

Following or after today's meeting, any further administrative points and updates will be discussed in the over e-mail in the future, so we, because these meeting times are.

0:50:52.80 --> 0:51:1.490

Alexandria Cedergren

You know, we'll be discussing larger topics and we want to make sure we use the time efficiently. We will not be using it anymore for administrative business after today.

0:51:5.150 --> 0:51:11.770

Alexandria Cedergren

And so we are working on putting together an educational meeting for early mid March.

0:51:11.930 --> 0:51:29.420

Alexandria Cedergren

Umm. As we kind of touched on in the last meeting that we want to make sure that everyone has kind of the same base of base knowledge of ILSFA materials and the program requirements and whatnot. And so we will be in touch on what that topic is and when you can expect that meeting.

0:51:31.380 --> 0:51:37.40

Alexandria Cedergren

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

Those meetings will also be recorded, so you could watch it on your own time if you're unable to attend that meeting.

0:51:38.200 --> 0:51:46.530

Alexandria Cedergren

And I did send out a notification of your subcommittee groups, so if you would like to change the group, you were.

0:51:47.700 --> 0:51:54.610

Alexandria Cedergren

Assigned to or if there is an additional committee subcommittee you would like to work on as well, please reach out to me over e-mail.

0:51:55.640 --> 0:52:17.190

Alexandria Cedergren

And I will also follow up with a calendar that outlines kind of the next three to five months. I think next five months of meetings it gives an estimate of dates doesn't necessarily give the exact date that we would hold the meeting on, but just kind of an idea of how we're outlining the next five months of the various full committee and subcommittee meetings in the near future.

0:52:18.420 --> 0:52:21.450

Alexandria Cedergren

Any question, comments on the administrative?

0:52:22.500 --> 0:52:23.340

Alexandria Cedergren

Updates.

0:52:24.770 --> 0:52:25.550

Alexandria Cedergren

While we're here.

0:52:31.170 --> 0:52:31.880

Alexandria Cedergren

All right.

0:52:33.630 --> 0:52:44.840

Alexandria Cedergren

Well, thank you all again for joining. This is my information and also just the general ILSFA team information. If there's any questions, comments, please don't hesitate to reach out.

0:52:45.930 --> 0:52:48.70

Alexandria Cedergren

And thank you all for joining. We will be in touch.

0:52:50.790 --> 0:52:51.480

Christianson, Elise

Thank you.

**Illinois Solar for All Advisory Committee Meeting Transcript  
February 17, 2023**

0:52:49.730 --> 0:52:51.610

Range, Justin J

Thank you. Thanks, Sally.

0:52:50.750 --> 0:52:52.190

Schmidt, Jennifer M.

Thank you all you.

0:52:49.820 --> 0:52:53.190

Alexandria Cedergren

Thank you. Thank you. Thanks all. Have a good day.

0:52:52.720 --> 0:52:54.520

Schmidt, Jennifer M.

We appreciate your participation.

0:52:56.250 --> 0:52:56.530

Alexandria Cedergren

Yes.
