# Subcontractor List

Illinois Solar for All (ILSFA) [Approved Vendors](#) are responsible for all aspects of solar installation for ILSFA projects and program requirements. Approved Vendors may also use subcontractors such as installers, marketing firms, and sales organizations. This is common in the solar industry to have multiple businesses play a role in the development of solar projects. While the Approved Vendor is ultimately the responsible party, the subcontractor is also required to follow all program requirements.

Subcontractors are required to register with the ILSFA program, identify the Approved Vendors they are working with, and include a list of services they provide. Below is the list of subcontractors who have completed a registration form and acknowledged they will comply with all program requirements. Suspended subcontractors **highlighted in grey** are under suspension.

This list should be used to cross-reference the subcontractors and the Approved Vendors they are working with. If you are working with an Approved Vendor's subcontractor and do not see the subcontractor listed below, please contact Illinois Solar for All at 1-888-970-ISFA.
